

Course Data Sheet

ART101SP – Getting Started with the Adoption Readiness Tool (ART)

Course No.: ART101SP-5402	Category/Sub Category: Digital
For software version(s): 5.40.2 Software version used in the labs: 5.40.2	Course length: Approximately 60 minutes, Self-paced, online eLearning
Delivery formats: eLearning	Audio: Yes
To order visit: Micro Focus Education	

Course Description

This Course covers how a subject matter expert (SME) can quickly use ART to record an application, add narrations, notes and publish.

Audience/Job Roles

This course is intended for: Subject matter experts on any application, whether it be local or SaaS based.

Prerequisites/Recommended Skills

SME in your respective discipline

Course Scenario

You are a subject matter expert and have to create learning material to help guide others in using an application, whether that be an application on a PC or one hosted via SaaS. You will be using ART to record simulation's, add notes, stencils and publish this information so others can access, via a share. You will also provide your Content Development Team with the necessary files so they can publish your information to an LMS or a website. You have no experience with ART.

Course Topics

Lessons	Objectives
Lesson 1 : Installing ART	<p>Concepts: Install ART on your PC and add a license.</p> <p>Demo: Demonstrate installing ART and adding a license.</p> <p>Time: 8 minutes</p>
Lesson 2 : Recording with ART	<p>Concepts: Record the use of a local application and add voice narration using ART.</p> <p>Demo: Demonstrate recording an application on a PC, and adding voice narration.</p> <p>Time: 8 minutes</p>
Lesson 3 : Editing your ART Recording	<p>Concepts: Edit your current recording, and add any necessary information notes.</p> <p>Demo: Demonstrate editing your ART recording, and adding information notes.</p> <p>Time: 8 minutes</p>
Lesson 4 : Publishing your ART Recording	<p>Concepts: Preview and publish your ART recording as simulations and a job aid.</p> <p>Demo: Demonstrate how to preview and publish your ART recording as simulations and a job aid. Also, demo how you can edit your job aids.</p> <p>Time: 8 minutes</p>
Lesson 5 : Creating an ART Course	<p>Concepts: Create an ART course by adding ART stencils, your simulations, and your job aids.</p> <p>Demo: Demonstrate creating an ART course, adding information using ART stencils with voice narrations, adding your simulations and your job aids.</p> <p>Time: 10 minutes</p>
Lesson 6: Publishing your ART Course	<p>Concepts: Preview and publish your ART course.</p> <p>Demo: Demonstrate how to preview and publish your ART course. What to send to a share and what to provide to your Content Development Team so they can use your content to publish to a website or LMS.</p> <p>Time: 10 minutes</p>
