

Adoption Readiness Tool ART ELE Cloud

Boost the user adoption of your business applications

With the current business continuity challenges of prolonged absences, remote working, and office closures due to COVID-19, Micro Focus recognizes that our customers need to adopt quickly to new practices, business applications and collaboration solutions. Micro Focus offers the Adoption Readiness Tool to help customers rapidly create their own structured onboarding content. Pre-built ART courses and online digital courses are available to learn how to use the Micro Focus IT solutions. Micro Focus ART is available as one of our COVID-19 business continuity solutions.

The Adoption Readiness Tool ART ELE Cloud is a collaborative, all-in-one approach to create multimedia learning content with a centralized web based content management repository and an online learning library for easy distribution of the learning content. ART ELE Cloud goes way beyond the normal out-of-the-box software education experience. It includes a very powerful authoring tool that allows you to easily customize and create your own onboarding content across your entire IT environment that will boost the conceptual knowledge and hands-on skills of your users.

With the ART Capture Engine your users can simply record their on-screen actions and publish it into dozens of outputs including Show-Me and Try-Me simulations, videos with voice narrations and step-by step job aids published in MS-Word, PDF, MS-Excel and MS-PowerPoint. ART content can also be exported as SCORM or AICC files for uploading into your Learning Management System (LMS) when required. With the ART ELE Cloud Developer Kit anyone can easily create onboarding courses with multimedia content like videos, hands-on simulation-based exercises, job aids and other relevant documents.

With the ART ELE Cloud Portal your learning content is centrally stored in the version controlled repository and published on the integrated online Learning Library which can be accessed with a web browser anytime, anywhere. Learners can search and navigate through the content in the online Learning Library, view their assessment results, subscribe for content change notifications by email, provide feedback to the authors and share relevant training with others. With ART ELE Cloud your users have always access to the latest onboarding content, anytime, anywhere.

Micro Focus provides pre-built simulation-based ART courses to enable your employees in using the Micro Focus IT solutions. The Micro Focus pre-built ART courses contain multimedia content like Show-Me and Try-Me simulations, videos, interactive images and assessments with Test-Me simulations.

ART ELE Cloud achieves new levels of simplicity and affordability in the drive to produce, distribute, and update productivity-enhancing software education in support of software rollouts. ART ELE Cloud delivers on day one with our ready-to-use, pre-built ART content, providing high quality, self-paced learning for the Micro Focus IT solutions, process flows and key tasks. What's more, with ART ELE Cloud you can create or translate content in 30 languages to bridge geographical barriers. Moreover, as business processes change, ART ELE Cloud allows you to quickly update your content using the ART Capture Engine.

Key features

Create: You can start with our expertise, and then customize and augment this content to match your software's unique configuration. ART ELE simulations can be edited simply and supported with commentary, process flow diagrams, and assessments.

Collaborate: Authors use the version controlled centralized repository which supports versioning, workflow, collaboration, search, and reporting. Learners can exchange knowledge and recommend content for a more engaging experience.

Publish: ART ELE Cloud provides a single source from which you can immediately publish a wide range of materials via preconfigured templates. These include business process documents, test scripts, hands-on practice simulations, job aids, classroom training guides, how-to demos, and many more. Features such as course animations, Web video embedding, and page transition effects engage learners.

Engage: You get easy access to simulation-based courses or instant refreshers and job aids through personalized learning and support portal of the ART ELE Cloud.

Extend: ART can be used to create materials for most Windows®, Web and JAVA applications.

Benefits

Get ahead: Prebuilt Micro Focus content puts your team months ahead for new deployments by providing hands-on simulations even before you've installed your new system. As your project progresses, you can easily customize the content.

Make the most of your software investment: Rapidly increase the competency of your teams, increase operational productivity, reduce errors and lower the number of support tickets.

Slash TCO: Rapid production of dozens of outputs from one input reduces costs drastically.

Cut support costs: Your users can resolve issues themselves using job aid simulations, and your help desk can create interactive how-to demos on the fly.

Lower risk: ART ELE Cloud can deliver consistent best-practice content across departments, languages, and regions to enforce compliance.

Visibility for management: It can provide real-time visibility into user proficiency, organizational readiness, and opportunities for further learning with out-of-the-box reporting and metrics.

Why ART ELE Cloud ?

Having competent users is critical to optimizing your investment in software. ART ELE Cloud makes it affordable and easier to help your people achieve competency through the production of engaging hands-on simulations, step-by-step documentation, and learning materials.

Staff can access simulation-based content and support tools immediately, anytime, anywhere, with instant refreshers that get them back to productivity in minutes. Moreover, content outputs can be updated from a single source file, making it simple to keep users' skills in step with the software lifecycle.

With the ability to centrally manage the multimedia content creation process in a Client/Server environment, ART ELE Cloud delivers a more collaborative and engaging user experience that promotes increased user adoption, business value and operational efficiency.

With this architecture, ART ELE Cloud can meet the needs of organizations where centralized L&D control, as well as more stringent document, workflow, and project management disciplines are required.
